XPANDA BIKESTORE Accessories

XPANDA BIKESTORE

The secure, flat-pack, man-portable bikestore

Thanks to its **robust steel construction** and **flat pack design**, Bikestore can be simply carried to any location, **easily assembled** and used to keep your valuable bike secure. All the components are **man portable** meaning they can be carried through narrow passageways and alleys or even through your house, opening up **previously inaccessible places** – no need for costly cranes or forklifts and no specialist tools needed for assembly. Once assembled, the **fully galvanised** steel Bikestore is remarkably robust, with a real **double locking system** with **insurance rated locks** to BS3621 to deter the most determined thief.

Here's why Bikestore is so popular with bike owners...

- **Demountable:** Dismantles into flat-pack form quickly and easily for re-locating
- **Complete:** Everything required for assembly is in the kit
- **Secure:** Double locking system is standard
- **Simple:** No specialist tools are required for assembly, just a socket set
- **Easy to follow instructions** mean it's ready for use in 1 hour

Moss Green
External (RAL 6005)
